Stephen:

It appears that you were planning on disposing of the waste from all tanks except Tank 7 as non-hazardous. Just looking at it, without knowing anything else, it would appear that they would be disposed of as the following:

Tanks 7: K052

Tanks 10, 26, and 27: K169

Is there a reason you did not consider Tank 10, 26, and 27 as hazardous waste?

Thanks
